A Chapter of the National Audubon Society

March 2017

YTC AND SHRUB-STEPPE Presented By Colin Leingang

Let's stay closer to home for this month's program. Most tion effort? Come and hear how our own Dan and Eileen of us know that the "Firing Center" is more properly called Kinney helped to transport grouse to Yakima from Ne-

the Training Center. Some of us have been out there to enjoy this huge (over 500 square miles) tract of undeveloped habitat. A few of us have been fortunate and seen the sage grouse that live there.

We know that the sage grouse is having a difficult time these days, so why can we still find them at the Training Center?

Our speaker will be Colin Leingang who is the Wildlife Program Manager at the Training Center. He will be sharing the Center's efforts to track the sage grouse

vada.

His will be a great program, and a chance to learn more about Yakima Training Center's unique assets and what may be done to preserve them for future generations of humans and wildlife. For more information on the value of shrubsteppe habitat, see the Conservation article in this Crier.

As of Calliope Crier press time, the program has not been approved by the Base Commander. We might be treated

with telemetry. And did you know that there is a repopula- to a different program.

Mark your calendar for Thursday, March 23, at 7:00 to see this presentation at the Yakima Area Arboretum

which begins with bluebirds and Say's

birded places.

last fall. It will allow for birding the Satus Wildlife Area as courage you all to consider volunteering at TNWR this seawell as the Lateral "A" property (old Zimmerman farm). The son, even if it's just for a handful of shifts. You'll be surpermits are \$5.00 for day use are available at the sites and prised at how much you'll gain from the experience.

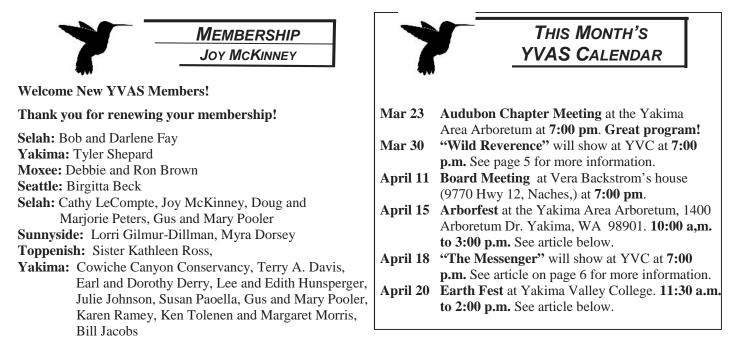

Spring migration is just around the \$20.00 for a season pass, from spring until hunting season corner! It is an amazing spectacle starts, are available at the Tribal Office.

The next opportunity I would like to share with you is the Phoebes in March, shorebirds like Toppenish National Wildlife Refuge. As many of you know American Avocets in late April, followed by warblers and a we started opening the visitor's center on Sundays last year host of other species in May. With this in mind I wanted to and will do the same this year. The goal is to have the center share a few opportunities to bird in some new or maybe under open from noon to 4:00pm every Sunday from April through June. It's given me a chance to have fun, share my interest One of the more exciting prospects is the "Yakama Na- in nature with the community and the opportunity to contion Wildlife Viewing Permit Program" that was launched stantly learn new things about our natural environment. I en-

The Yakima Valley Audubon Society meets on the fourth Thursday of January, February, March, April, May, August, September, and October at 7pm at the Yakima Area Arboretum, located at 1401 Arboretum Drive, Yakima, WA. Guests are welcome at these meetings. The Annual Meeting of the Society is held the first Thursday of December at 6pm. The Board of Directors meets each month except December at 7pm at locations announced in the Calliope Crier. Members may attend Board meetings; however, please notify the host because of possible space restrictions.

Visit the Yakima Valley Audubon Society's website at: http://www.yakimaaudubon.org

Earth Fest at Yakima Valley College

"Land is a community to which people belong."

This is one of the themes of the Earth Fest to be held at Yakima Valley College in conjunction with Earth Day. Earth Fest is a feature event of the year-long initiative YVC Reads: A Sand County Almanac by Aldo Leopold. Yakima Valley Audubon will host an educational station. In keeping with themes derived from Leopold's writing, our booth will feature the Shrub-Steppe. We will focus on what is special

about this incredible habitat around us, enjoying and preserving it

College students will tour the various stations hosted by YVAS and others. Earth Fest will take place on Thursday, April 20, 11:30 am to 2:00 pm in the Hopf Student Union **Building** (HUB).

For further information, or to volunteer to help, please contact, Ellen Stepniewski (steppie@nwinfo.net 509-731-6805)

- March 25 (Saturday) Shrub-steppe Zone fieldtrip. Led by Andy and Ellen Stepniewski. Contact Andy and Ellen for details and meeting place and time: steppie@nwinfo.net. On this trip we will head out into the sagelands of the western Columbia Basin starting in the Yakima Canyon before heading north into the Wenas Wildlife Area on Sheep Company Road. Ellen and Andy will introduce you to the plants and birds of the shrub-steppe ecosystem, a northern extension of the Great Basin semi-desert. There are a variety of different plant communities in this landscape, each with a different assortment of birds. Some of targets will be: Golden Eagle, Prairie Falcon, Chukar, Long-billed Curlew, Canyon and Rock Wrens, Burrowing Owl, Say's Phoebe, Loggerhead Shrike, Horned Lark, Sage Thrasher, various "desert" sparrows: Brewer's, Vesper, and Sagebrush, and Western Meadowlark.
- March 31 (Friday) or April 1 (Saturday) or ??? (Weather /Participant Dependent) Bluebird Box Cleanout It is spring and once again time to clean out and inspect the 132 nest boxes on the Vredenburgh Bluebird Trail in preparation for the upcoming nesting season. To facilitate the assignment of boxes to teams, please contact Richard Repp (bbirder247@gmail.com or 965-1134) if you wish to help or for further info. A half-day event but bring snacks, drinks, and work gloves. Clothing for wind and rain protection recommended as are sturdy footwear.
- April 19 (Wednesday) Conboy NWR. Join leaders Bill Drenguis and Joe and Karen Zook on a trip to Conboy NWR in Klickitat County. We will be enjoying the beautiful scenery and hoping to spot Sandhill Cranes, which nest on the refuge. Some other great birds which may be found there include Red-breasted Sapsucker, Western Bluebird, Common Yellowthroat and the fabulous Marsh Wren. On last year's trip, we also found Calliope and Rufous Hummingbirds, some very cooperative Purple Finches, Pygmy Nuthatches and a Nashville Warbler. We will be carpooling, and this will be an all day trip. In addition to Conboy, we plan on a couple of quick stops along the way. Dress for changing (spring) weather, and bring lunch, snacks, drinks and optics. Scopes are not required but if you have one, please bring it. Contact Bill at 965-5808, or email the Zooks at gadzooks7@charter.netfor meeting place and time.
- April 23 (Sunday) Satus Wildlife Area. We will explore a small part of the 3,276 acres of upland and floodplain habitats, shrub-steppe, grassland habitats, and riparian, wetland habitats of the recently opened Satus Wildlife Area. located along the Yakima River 11 miles southeast of Toppenish, this property borders the Yakima River for about 8 miles of meandering shoreline. It contains one of the few remaining river sections with mature riparian forest. Natural resources values in the Satus Wildlife Area include nesting, feeding and wintering habitat for numerous wildlife, including breeding and migratory species of ducks, upland game birds, songbirds, herons, eagles, osprey, otter, beaver and deer. Bordering the Yakima River with about 8 miles of meandering shoreline, it contains one of the few remaining river sections with mature riparian forest. This is a great half day field trip with birding opportunities close by for those who want to extend the day. Meet at 7:30 am at the Valley Mall parking lot north of Sears (old IHOP location). Contact Kerry Turley (840-0980 or you can send him an email at kdturley@gmail.com)

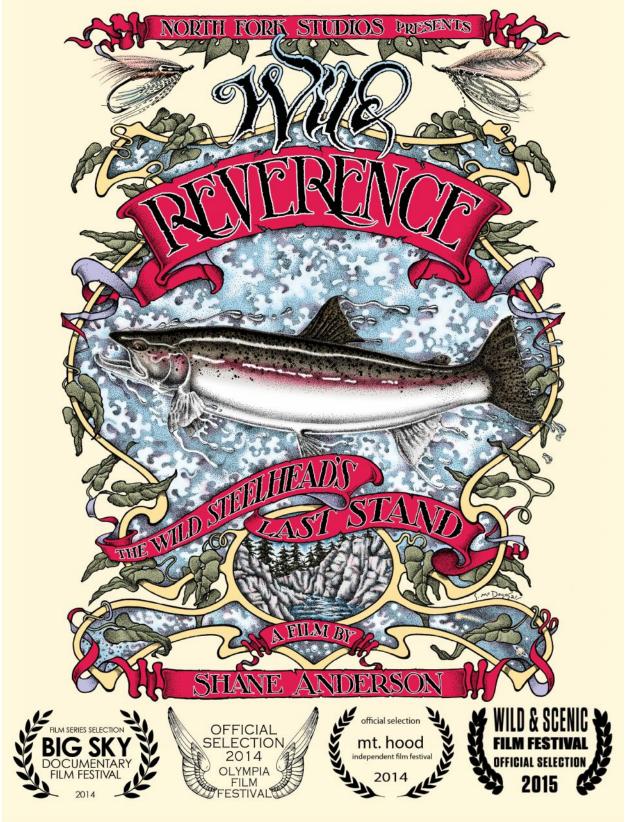

Further out... Save the date:

May 6 (Saturday) - Yakima County Migration Count. YVAS's annual "Birdathon" will be a county-wide bird count, as we try to tally species from different sectors in the county. Scott Downes will be putting teams together to cover all of the best areas to bird around Yakima including the White Pass, Chinook Pass, Lower Valley, Yakima Training Center, Toppenish and Wenas areas. Some teams start before dawn with owling, while most teams go all or most of the day. If you are interested in participating, contact Scott Downes (downess@charter.net)

YVC's Biology Department, YELF and Trout Unlimited are proud to present:

Wild Reverence

Yakima Valley College, in collaboration with the Yakima Environmental Learning Foundation (YELF) and Trout Unlimited, presents a showing of the documentary *Wild Reverence*. The free event will take place **Thursday, March 30**, **2017 at 7:00 pm** in Deccio Higher Education Center, Building 8, Parker Room.

The Messenger

April 18 at 7:00 p.m. in the YVC Deccio Bldg. 8, Parker Room

Here is the link to *The Messenger* movie trailer: http://songbirdsos.com/portfolio/official-film-trailer/ For thousands of years, songbirds were regarded by mankind as messengers from the gods. Today, these creatures – woven inextricably into the fabric of our environment - are vanishing at an alarming rate. Under threat from climate change, pesticides and more, populations of hundreds of species have dipped dramatically. As scientists, activists and bird enthusiasts investigate this phenomenon, amazing secrets of the bird world come to light for the first time in this acclaimed and visually thrilling documentary. Find out what's killing our songbirds, and what can be done about it. As in ancient times, songbirds may once again be carrying a message to humans – one that we ignore at our own peril.

The Messenger - Imagine a world without birdsong.

THE MESSENGER, a new documentary by award-winning filmmaker Su Rynard (Dream Machine, Kardia) chronicles the struggle of songbirds worldwide to survive in turbulent environmental conditions brought about by humans and argues that their demise could signify the crash of the ecosystems globally, akin to the disappearance of honey bees and the melting of the glaciers.

The Messenger is particularly effective at sounding the alarm because it makes the issue highly personal. With exclusive footage, and high-tech cinematography, the movie offers an intimate look at the plight of the songbird. Stunning flight sequences... are conveyed in slow motion, making the complexities of wing movement, control, and rhythm visible to the human eye.
